

The figure displays a complex time series plot with the x-axis ranging from 0 to 400. The plot is divided into three horizontal sections by a central horizontal line. The top section shows low-frequency oscillations in red and pink. The middle section is filled with numerous high-frequency oscillations in various colors (blue, green, yellow, orange, red, purple, etc.). The bottom section shows low-frequency oscillations in orange and yellow. The plot illustrates the behavior of multiple time series over time, with a clear separation between the high-frequency and low-frequency components.
